Does the project require a SkyQ enabled dish installation and digital freeview services? This will ensure sky can be easily installed and digital freeview would be made available
SkyQ enabled dish Digital Freeview Aerial Foreign satellite service
Audio
Do you have a preferred music platform that you would like to stream?
Spotify Tidal Airplay TuneIn Radio Other
Please specify other here
How many rooms would you like audio in?
We have a selection of speaker choices from in-ceiling speakers, plaster over options, floor standing – do you have a preference?
Standard in Ceiling Premium In Ceiling Plaster Over / Invisible Special / Other
Any outdoor audio requirements? This is very popular these days with many speaker styles and technologies to choose from
Video How many TV's you would like? Don't include TV's for home cinema or surround sound systems Number of TV's between 32" - 35" Diagonal Size Number of TV's between 60" - 100" Diagonal Size
Do you want to centralise your video sources (Cable TV, Apple TV, Roku, No No No No No No No No No N
This is called "video distribution" and reduces the amount of audio/video equipment located at each TV location / room
Please provide any additional information here
Do you require any sound bars / subwoofers to improve TVs sound? Yes No

Home Cinema Do you require a dedicated home cinema room? Yes No		
Media Room Based around a large TV and dolby atmos surround sound package Entry Level This is typically a theatre room with a video projector, projection screen and a receiver-based audio system Performance This is typically a theatre room with a high performance projector and projection wide screen with a theatre Premium This is typically a spare no expense cinema room with the very best equipment available and acoustic design depending on room size and level of performance desired.	e-quality sound system.	
Fire Alarm Have you had a fire risk assessment? Yes No Do you require a fire alarm system? Yes No		
Please provide any additional information here		
Intruder Alarm Do you require an intruder alarm system? Does your insurance company have any stipulations on the level of intruder alarm?	Yes	No
Please specify here	Yes	No
Does the project require a monitored system and police response? How about a panic or safe room?	Yes Yes	No No

ссти
Do you require CCTV? Yes No
Please advise the areas of coverage required externally
Are any internal camera's required? Yes No
Please advise the areas of coverage required internally
Access Control/Intercom Does your project require any access control of intercom services? Yes No Please provide any additional information here
Lighting Control
Do you want a lighting control within your house? Lighting control systems reduce wall clutter, allow preset lighting scenes at the push of a button, increase security, and add convenience.
Yes, the whole house and exterior Only a couple rooms
Yes, the main areas of the house and exterior only No, I will use conventional wall switches
Please provide any additional information here

Shade Control				
If desired, provide your best guess on I	d shading? ence, address privacy concerns, and can be used now many windows/shades you want to motoris ws, and dual-roller shades (both sheer and priva	e. The higher-end products
